

WIC Bits

NOVEMBER 4TH, 2016

"Until the playing field has been leveled and lingering stereotypes are gone, you can't even ask the question [of whether men are naturally better at mathematics and science]."

– Sally Ride, First American Woman in Space, Founder of NASA's Office of Exploration, and Founder of Sally Ride Science (a company to help inspire females to pursue their interests in science and mathematics)

Other Upcoming WIC Events

Hacker Fellows Tech Talk -

November 22nd @ 6 PM

2400 Engineering Building

Career & Networking Opportunities!

Duo Security

Many of you may remember Duo from our Security Panel event last week! Based out of Ann Arbor, they are actively looking to hire interns and entry-level candidates in all parts of the organization - their engineering team,

including software development and design, their research team (Duo Labs), their application and corporate security teams, and their IT department. For more information about Duo, check out their [website](#)!

If you are interested, reach out to Anna at anna@duo.com. She will be able to forward your cover letter and resume along!

Computer and Information Security Practice

If you are interested in computer and information security and would like to get more information about how to get started with it, contact allswed8@msu.edu to get information and links left by our Security Panel members!

Advancing Women in Business

When : Tuesday, November 15th

5:00 - 8:00 PM

Where : MSU Kellogg Hotel & Conference Center

Details : This is a free event, sponsored by the MSU Broad College of Business. It focuses on women in the workforce and affords a chance to mix and mingle with women leaders, learn about skills sets to build for leadership, and the do's and don'ts for early career women. **They are very excited to have women engineering students attend.**

Registration is on [eventbrite](#). There are two pre-conference workshops and the main event. If you are interested in attending, please register soon.
